

# Furnaces For Industry

At **Excel Heat** we specialise in batch and continuous furnaces for all types of ferrous and non ferrous heat treatment with temperatures upto 1300°C (2400° F)

We have been designing and building furnace for over 30 years and in that time we have supplied equipment to some prestigious companies requiring very exacting standards to specific design criteria

At **Excel Heat** furnaces are designed and manufacture in house by qualified experienced engineers to ensure the quality of our product.

Over the years **Excel Heat** has produced numerous furnaces which have varied greatly in type, configuration and size some specially designed and manufactured to suit our customers requirements.
